2nd grade PE

(Jumps, etc)

"Do I have any gymnastic kids here who can show us a Star jump?"

-Great use of including experienced kids. Real World connection

Used dots on the floor as placemats for kids to stand/sit

Brayden O'Brien (behavior)

Practiced 3 different jumps, practiced. Nick then called out a jump and kids had to show/practice

Lots and lots of energy in this class.

Stations. Hurdles., balance beams, round bouncy balls things.

Every use a whistle as an attention getter? And there you just did.

Lots of movement and very short times to sit and listen. Heart rate stays up.

Tag game. With foam noodles

Had girls get shoes. Boys picked up dots and then got shoes.

"I'm picking people to line up who are showing me they are ready."

What is your prof level goal from last spring? Progress?

Really wonderful demeanor with the kids!! Kids like Mr. Green a lot.

Excellent lesson choice and had many skills incorporated.

Notes rom Post Conference:

Nick: Reflected on amount of time spent moving vs giving directions.

-The amount of movement for this class seemed appropriate.

For behaviors such as Brayden: Gives positive reinforcements. Child gets emotional when called out.

Come in ...do we warm up right away or give directions. Experimented with both..prefer warm up first then instruction.
